LIFELONG LEARNER

EXPERIENCE

EDMAD | Software Engineering Intern
Sept 2020 – present | Remote

- Built a hackerrank bot to scrape leaderboards of multiple contests and create a csv for analysis
- Developed an educative platform for students to prepare for interviews in nextjs.
- Involved in end-to-end developement cycle, from ideation, investigation, design, implementation, telemetry and testing

KEVIZ TECHNOLOGY | Software Engineering Intern
May 2020 – Aug 2020 | Remote

- Created Admin Panel in React.js using react-admin library.
- Worked on the back-end in Node.js and MongoDB and created APIs for the admin panel and the customer's mobile app.
- Worked on the customer's Mobile app in react-native, refactored the code for better readability and debugged the firebase OTP system.

ACHIEVEMENT

SIH'20 FINALIST | Front-end developer
Worked on front-end of a web app which predicts the ground water level of a particular place so that it helps farmer save money and ultimately their lives. Used data available on the government site, and plotted the ground water level on maps and the graphs of ARIMA model comparing the region over a span of 10 years at national, state, district and block level. This could help government to analyze the situation of the ground water at that region and help to refill groundwater.

EDUCATION

CMR INSTITUTE OF TECHNOLOGY | BE in Computer Science
2019 - 2023 (Expected) | Bangalore, India • Cum. GPA: 9

DELHI PUBLIC SCHOOL | 12th with Science (PCM)
2016 - 2018 | Bokaro, India
Passed with 80%

DAV PUBLIC SCHOOL | 10th
2004 - 2016 | Bokaro, India
Passed with 10 CGPA

LANGUAGES

PROGRAMMING
Confident in:
React js • Node js • JavaScript • CSS • Python
Worked with:
C • C++ • Sass • Java • Shell
Familiar with:
Android • MySQL • MongoDB • Docker

SPOKEN & WRITTEN
Native fluency:
English, Hindi
